2. Installation Guides

2.1 System Requirements

This section describes the minimum system requirements to run and operate the EELPM-FPT system locally, including the Backend API, Frontend Web Client, and Database Server.

2.1.1 Backend Application

Item	Specification
Operating System	Windows 10/11 (64-bit) or Ubuntu 20.04+
Runtime Framework	.NET SDK 8.0 (64-bit), ASP.NET Core 8.0 Runtime
IDE	Visual Studio 2022 (v17.x) or JetBrains Rider
CPU	2 cores minimum
RAM	4 GB minimum (8 GB recommended)
Storage	10 GB free disk space
Default Port	http://localhost:7231

2.1.2 Frontend Web Client

Item	Specification
Technology Stack	SvelteKit, TypeScript, TailwindCSS
Node.js Version	20.x LTS
Package Manager	pnpm

Supported Browsers	Google Chrome 100+
Default Port	http://localhost:5174

2.1.3 Database server

Item	Specification
Database Engine	Microsoft SQL Server 2022
Management Tools	SQL Server Management Studio (SSMS 20.x)
Logical Database	EELPM – main application database for EELPM.
RAM	2 GB minimum dedicated to SQL Server

2.1.4 Third-Party Services & Configuration

Service	Purpose	Key Configuration
JWT	Authentication & Authorization	JWT_Secret Key, JWT_Issuer, JWT_Audience
Cloudinary	File & avatar storage	CLOUDINARY_CloundName, CLOUDND_ApiKey, CLOUDINARY_ApiSecret
Google OAuth 2.0	Google Sign-in	Google_ClientId, Google_ClientSecret
SMTP(Gmail)	Email notification	SMTP_Email, SMTP_Password, Port:587
FAP API (Mock)	Sync academic data	FAP Mock endpoint configured in appsettings.json

Note:

- The FAP API integration is currently simulated via FapMockController during the development phase, as the team has not yet established contact with FPT's IT department to obtain access to the actual FPT Academic Portal system. The mock endpoint replicates the FAP data synchronization flow for academic data
- The FEID OAuth 2.0 integration is currently simulated via FeidOAuthController during the development phase, as the team has not yet established contact with FPT's IT department to obtain access to the actual FPT Education ID identity server. The mock endpoint replicates the FEID authentication flow..

2.2 Installation Instruction

2.2.1. Database Installation

This section provides instructions for installing and configuring the Microsoft SQL Server 2019

database used by the CodeUP system.

Databases are required:

- EELPM (main system database)

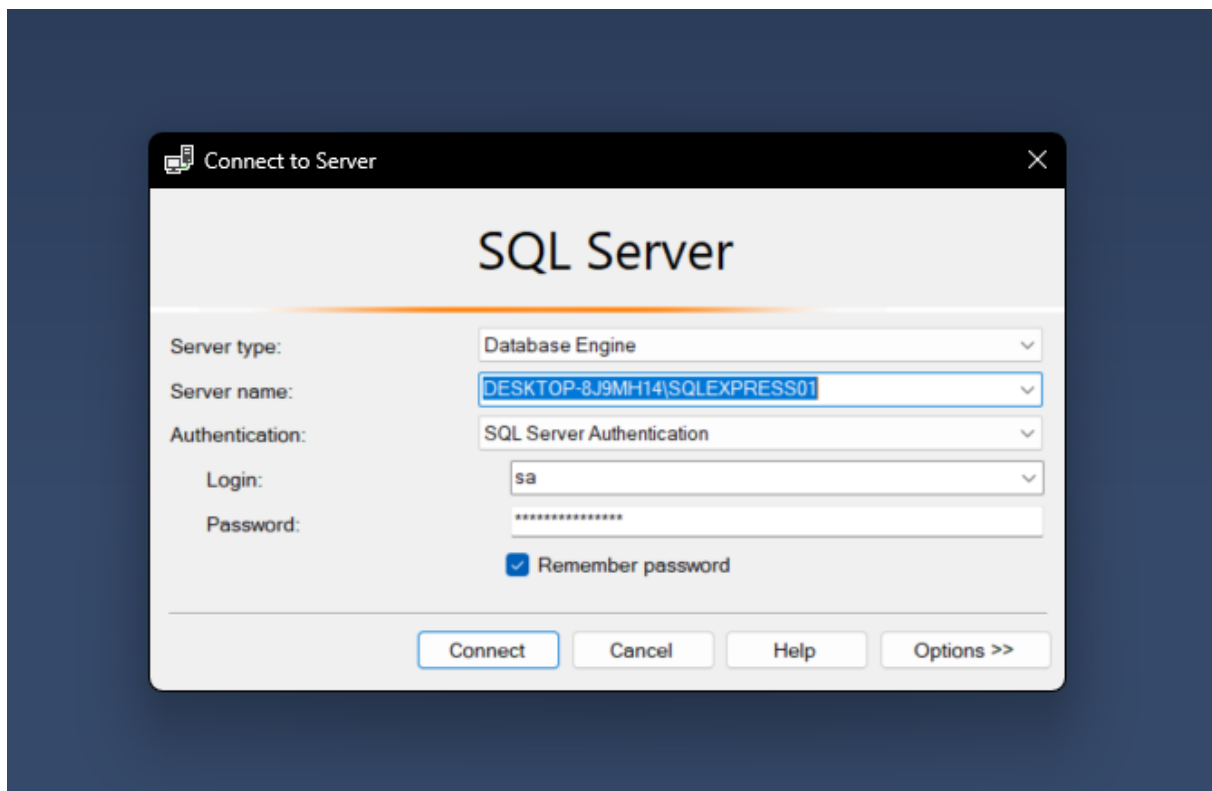

Prerequisites

- Microsoft SQL Server 2019 installed locally
- SQL Server Management Studio (SSMS) 20.x installed
- SQL script files: EELPMSQLServerSchema.sql

Step-by-Step Installation Guide:

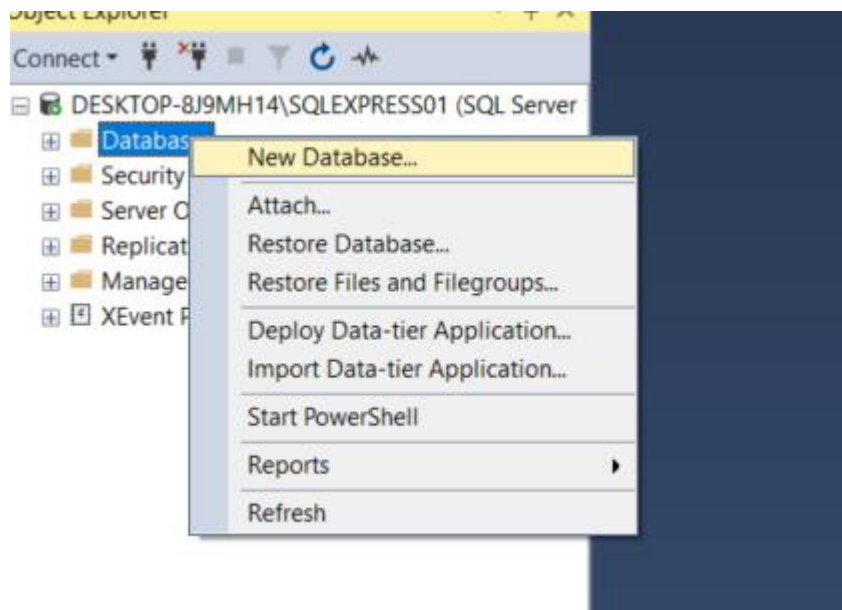

Step 1: Connect to SQL Server

- Open SSMS. Enter Server name localhost (or .\SQLEXPRESS)
- Select SQL Server Authentication
- Enter username and password. Click Connect.

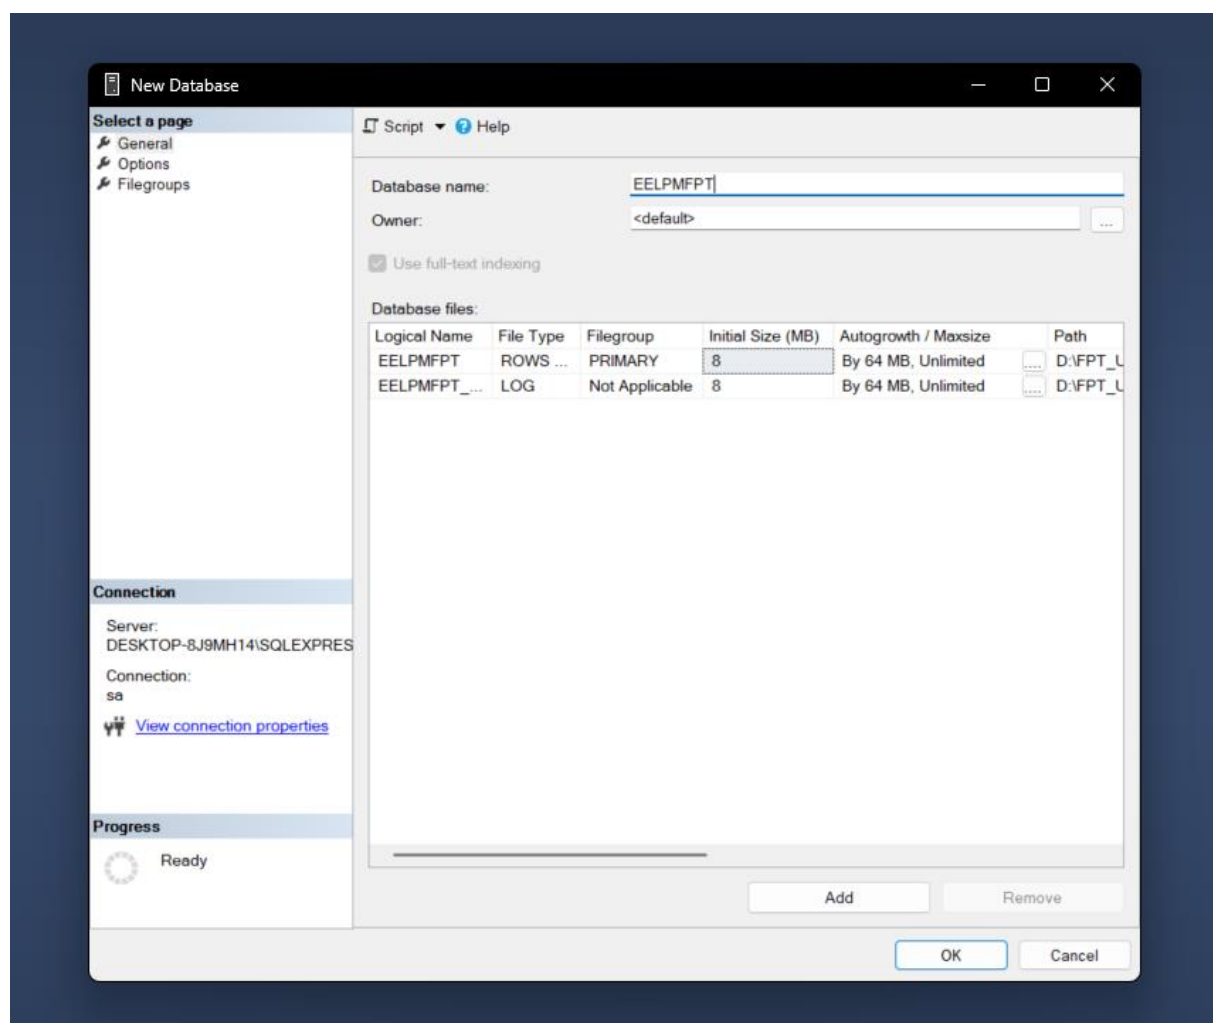

Step 2: Create the Database

- Right-click Database → New Database

- Enter name: EELPMFPT
- Click OK.

Step 3: Run the Schema Script

Open EELPMSQLServerSchema 1.sql in SSMS. Ensure the selected database is EELPMFPT. Press F5 to execute. Verify all tables appear under EELPMFPT → Tables.

2.2.2. Backend Installation

Prerequisites

- .NET 8 SDK installed — verify with `dotnet --version`
- Visual Studio 2022 with ASP.NET and web development workload installed
- SQL Server running locally with EELPMFPT database ready

Step-by-Step Installation Guide

Step 1: Clone the Repository

```
PS D:\> git clone https://github.com/sep490g72/EXE_Man.git
```

Step 2: Configure appsetting.json

- Open EXE_Man_Sp26.API/appsettings.json and fill in:

```
{
  "Logging": {
    "LogLevel": {
      "Default": "Information",
      "Microsoft.AspNetCore": "Warning"
    }
  },
  "AllowedHosts": "*",
  "ConnectionStrings": {
    "DefaultConnection": "Server=.;Database=EELPM_FPT;Trusted_Connection=True;TrustServerCertificate=True"
  },
  "Google": {
    "ClientId": "474083949675-7ju52sbtglq8te9gvpgpkqeq3ht6eiufn.apps.googleusercontent.com",
    "ClientSecret": " ",
    "RedirectUri": "https://localhost:7231/api/auth/google/callback"
  },
  "Jwt": {
    "SecretKey": " ",
    "Issuer": "EELPM_FPT",
    "Audience": "EELPM_Client",
    "AccessTokenExpiryMinutes": "5",
    "RefreshTokenExpiryDays": "7"
  },
  "Email": {
    "SmtpHost": "smtp.gmail.com",
    "SmtpPort": "587",
    "SenderEmail": "noreply.eelpm@gmail.com",
    "SenderPassword": " ",
    "SenderName": "EELPM-FPT System"
  },
  "CloudinarySettings": {
    "CloudName": "dmoq4hnfp",
    "ApiKey": " ",
    "ApiSecret": " "
  },
  "FapSync": {
    "BaseUrl": "https://localhost:7231/api/fap-mock",
    "MaxParallelCampus": 3
  },
  "FeidOAuth": {
    "RedirectUri": "http://localhost:5173/feid-callback"
  }
}
```

Step 3: Restore Dependencies & Run

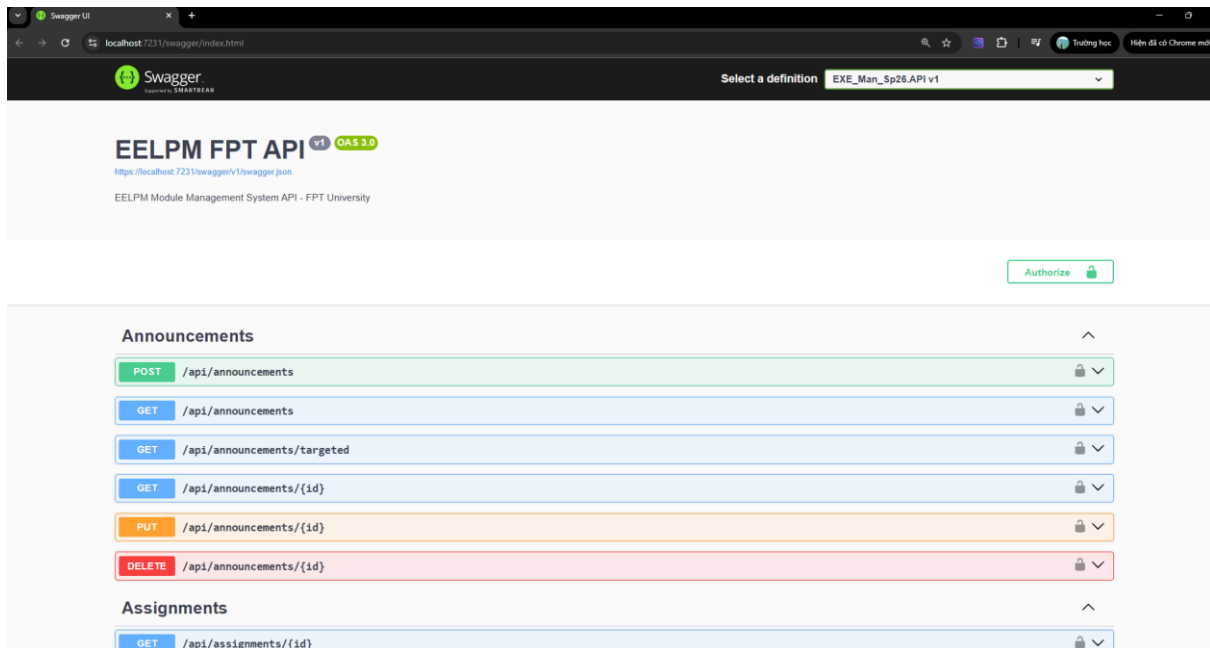

```
bash

dotnet restore
dotnet run --project EXEManSp26.API
```

Or open EXEManSp26.sln in Visual Studio 2022 and press F5.

Step 4: Verify

Open browser: <http://localhost:7231/swagger/index.html> — Swagger UI should load with all API endpoints listed.

2.2.3. Frontend Installation

Prerequisites

- Node.js 20.x LTS installed — verify with `node -v`
- pnpm installed — verify with `pnpm -v` (install via `npm install -g pnpm`)
- Backend API running locally on port 5000

Step-by-Step Installation Guide

Step 1: Clone the Repository

```
PS D:\> git clone https://github.com/khazuuman/EEL_PM_FE.git
```

Step 2: Install Dependencies

```
PS D:\FPT_University\Do_an\EXE_Frontend\EEL_PM_FE> pnpm install
```

Step 3: Configure Environment Variables

- Copy `.env.example` to `.env` and fill in:

```
# URL backend local (dev)
PUBLIC_API_BASE_URL_LOCAL=https://localhost:7231/api

# URL backend deploy (prod)
PUBLIC_API_BASE_URL_PROD=https://api.eel-pm.yourdomain.com

# Google Key
GOOGLE_CLIENT_ID=474083949675-7ju52sbtglq8te9gvgpkqeq3ht6eiufn.apps.googleusercontent.com
GOOGLE_CLIENT_SECRET=

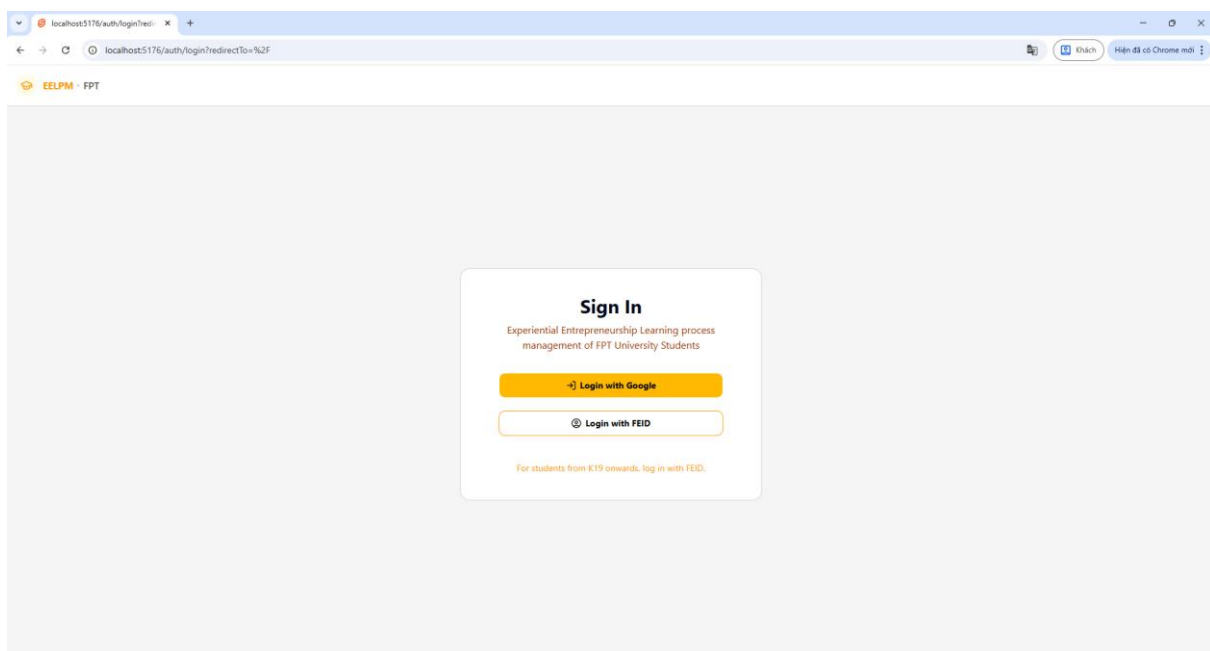

PUBLIC_APP_URL=http://localhost:5173
```

Step 4: Start Development Server

```
PS D:\FPT_University\Do_an\EXE_Frontend\EEL_PM_FE> pnpm run dev
```

Step 5: Verify

- Open browser: <http://localhost:5173> — the EELPM-FPT login page should appear.

3. User Manual

3.1 Overview

EELPM-FPT (Experiential Entrepreneurship Learning Process Management for FPT University) is a web-based platform designed to manage the full lifecycle of the Experiential Entrepreneurship Learning (EEL) subject at FPT University. The system facilitates collaboration between students, lecturers, mentors, and academic staff throughout the entire process — from group formation and project topic registration to assignment submission, mentoring, and final project delivery.

The platform is built on a modern technology stack: a C# .NET 8 RESTful API backend with Microsoft SQL Server, a SvelteKit frontend, SignalR for real-time communication, Google OAuth and

JWT for authentication, and SMTP email notifications. Data is synchronized with the FAP academic system to ensure accuracy of student, class, and lecturer information.

3.1.1 System Actors

The system supports six distinct user roles, each with a dedicated interface and set of permissions:

Role	Access Level	Responsibilities
Student	Group Member	View class groups, send/cancel join requests, respond to invitations, view group topic & history, submit assignments, chat with group, view announcements and meetings.
Leader	Group Leader (Student)	All Student actions plus: manage group members (invite/kick/approve requests), edit group info, submit group for approval, register/update/resubmit/change project topic.
Lecturer	Class Instructor	Manage class settings, set group formation & topic registration deadlines, create/update groups, approve/reject submitted groups and project topics, create assignments, grade submissions, send announcements, assign mentors.
Mentor	External Advisor	View assigned groups and their progress, schedule and manage meeting sessions, participate in group chat, view assignment timelines and submissions.
Academic Staff	Administrative Staff	Manage courses; import mentor and student data; synchronize academic data from the FAP system; manage class listings.
Admin	System Administrator	Full system access: manage user roles, monitor system health, configure system settings, manage all entities across all roles.

3.1.2 Main Features

The system is organized into the following functional modules:

No.	Module	Description
1	Authentication & Authorization	Login via email/password or Google OAuth. JWT-based session management with role-based access control.
2	Profile Management	View and update personal profile information including avatar, contact details for all roles.
3	Class Management	Lecturers manage class details, set group formation and topic registration deadlines, view student lists, and manage assignment timelines.
4	Group Management	Lecturer-created or auto-allocated groups. Students can join via requests or invitations. Leaders manage membership and submit groups for approval.
5	Project Topic Management	Leaders register project topics for approval. Lecturers approve or reject submissions. Supports topic updates, resubmission after rejection, and change requests after approval.
6	Assignment Management	Lecturers create assignments with deadlines and attachments. Groups submit files; lecturers grade submissions and provide feedback.
7	Announcement Management	Academic staff and lecturers publish announcements targeted to specific classes or roles. Students and mentors receive notifications.
8	Meeting Management	Lecturers and mentors schedule meeting sessions for groups with date, time, and Google Meet links.
9	Chat Management	Real-time group messaging via SignalR. Members can send text messages and upload files within their group chat room.

10	Mentor Management	Academic staff import and manage mentor profiles. Lecturers assign mentors to approved groups with a cap of 5 active groups per mentor.
11	Import & Sync	Import mentor and student data from Excel files. Synchronize class, student, lecturer, and campus data from the FAP academic system.
12	Export	Lecturers export class grade reports to Excel format, consolidating all assignment scores for all groups.

3.1.3 User Workflow Overview

The typical end-to-end workflow in the EELPM-FPT system follows this sequence:

Phase	Activity	Actor(s)	Detail
1	System Setup	Academic Staff / Admin	Create semesters and campuses. Import or sync students, lecturers, and class data from FAP.
2	Class Preparation	Lecturer	Review class roster. Set Group Formation Deadline and Topic Registration Deadline.
3	Group Formation	Lecturer / Student	Lecturer creates groups manually or auto-allocates. Students join via requests or invitations. Leader submits group for approval.
4	Group Approval	Lecturer	Review submitted groups. Approve or reject with feedback. Publish all groups to make them visible to students.
5	Mentor Assignment	Lecturer	Assign a mentor to each approved group (max 5 groups per mentor).

6	Topic Registration	Leader / Lecturer	Leader registers project topic. Lecturer approves or rejects. Leader can resubmit after rejection or request a topic change after approval.
7	Assignment Cycle	Lecturer / Group	Lecturer creates assignments with deadlines. Groups submit files. Lecturer grades and provides feedback.
8	Mentoring & Meetings	Mentor / Group	Mentor schedules meetings, monitors group progress, and communicates via group chat.
9	Communication	All roles	Announcements, notifications, and real-time group chat keep all members aligned throughout the project.

3.1.4 System Access & Login

Users can access the system through two authentication methods:

- Email / Password login — for accounts with a password set by the administrator.
- Google OAuth login — only accounts using @fpt.edu.vn or @fe.edu.vn domain are accepted.

Upon successful login, the system issues a JWT access token and stores a refresh token in an HTTP-only cookie. Each user is automatically redirected to their role-specific dashboard based on the role assigned in their account.

Role	Landing Page after Login
Student / Leader	/app/student — Group & topic management dashboard
Lecturer	/app/lecturer — Class list and class management

Mentor	/app/mentor — Assigned groups and meeting schedule
Academic Staff	/app/academic-staff — Semester, campus, and data management
Admin	/app/admin — System configuration and role management

3.1.5 Supported Browsers & Requirements

The system is a web-based application accessible via any modern browser. No installation is required on the client side.

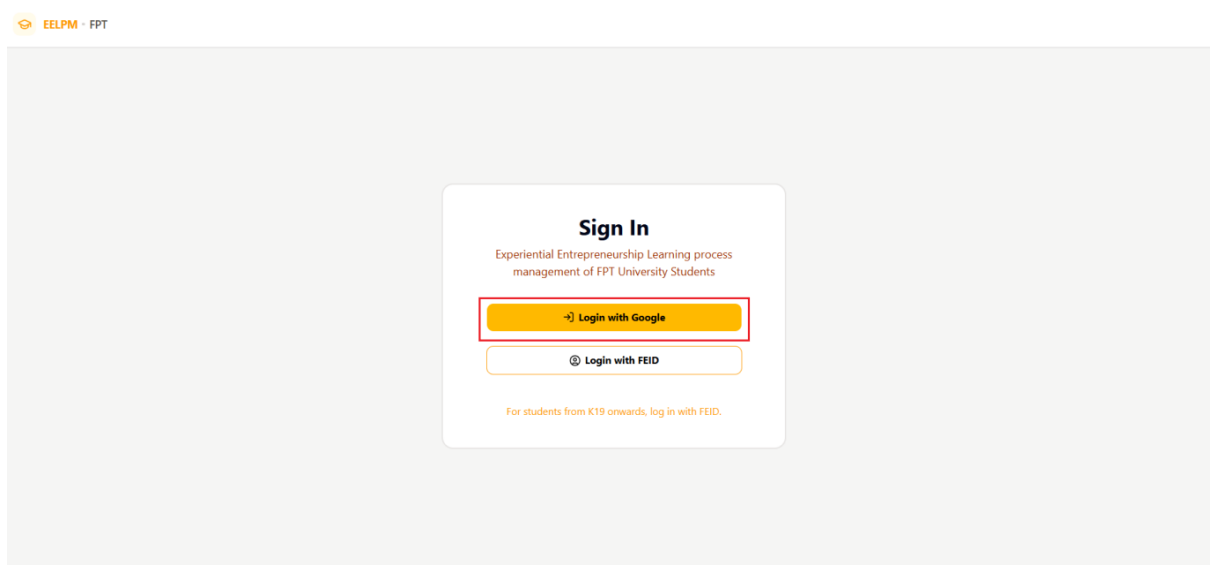

- Google Chrome (version 100 or later) — Recommended
- Microsoft Edge (Chromium-based, latest version)
- Mozilla Firefox (latest version)
- Safari (latest version, macOS / iOS)

A stable internet connection is required. Some real-time features (group chat, live notifications) depend on a persistent WebSocket connection via SignalR.

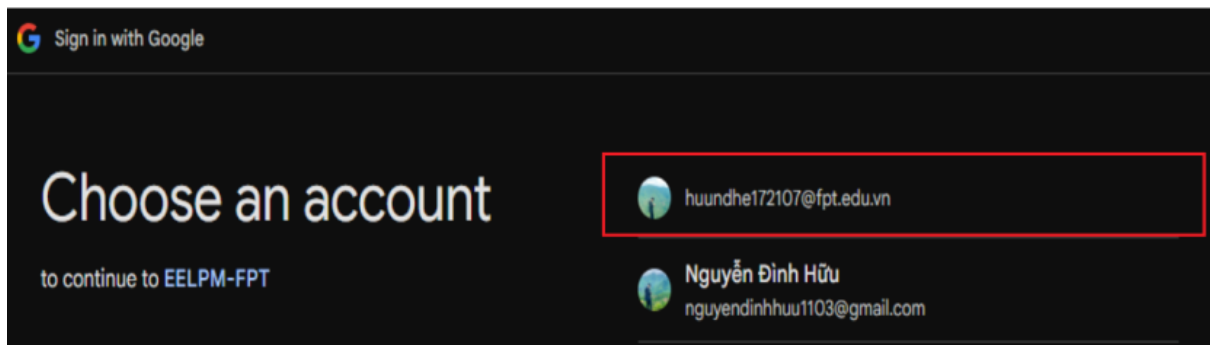

3.2 User Manual HomePage Side

3.2.1 Login with Google

Step 1: The user accesses the system and clicks “Login with Google”.

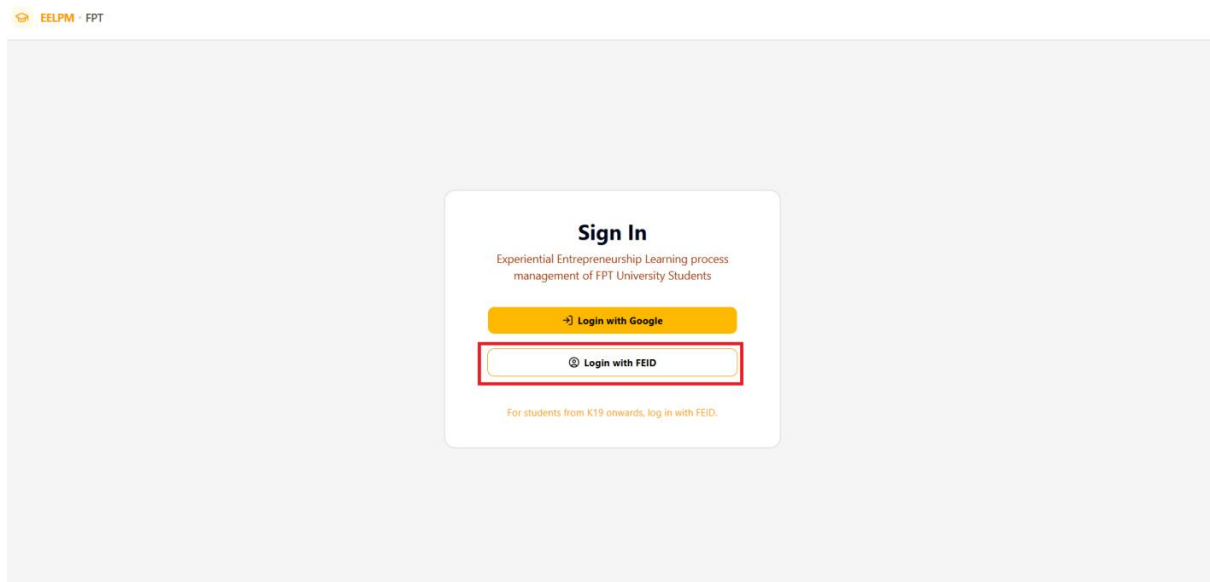

Step 2: Select an email account with domain @fpt.edu.vn or @fe.edu.vn.

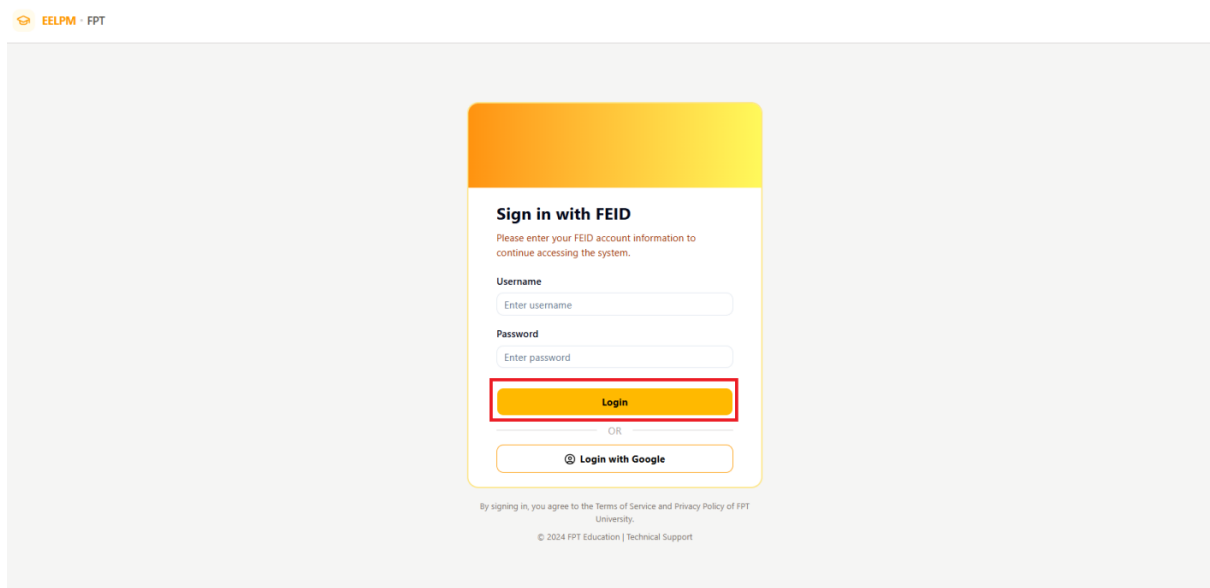

3.2.2 Login with FEID

Step 1: The user accesses the system's login page, click "Login with FEID".

Step 2: Enter the username and password, then click "Login".

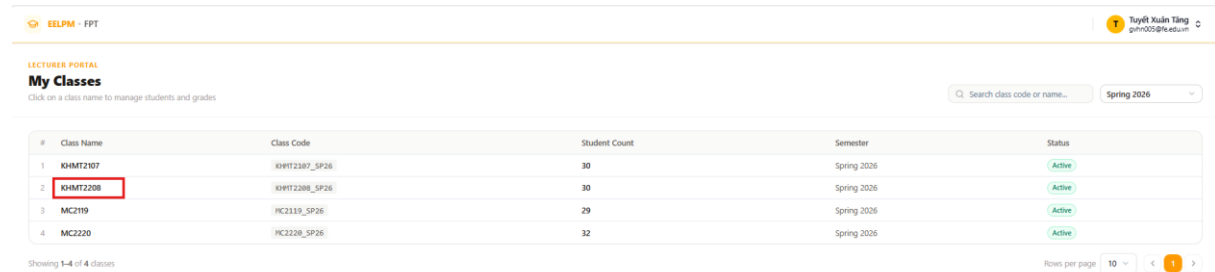

3.3 User Manual Lecturer Side

3.3.1 Class Entry

Access your classes from the main dashboard to begin setup.

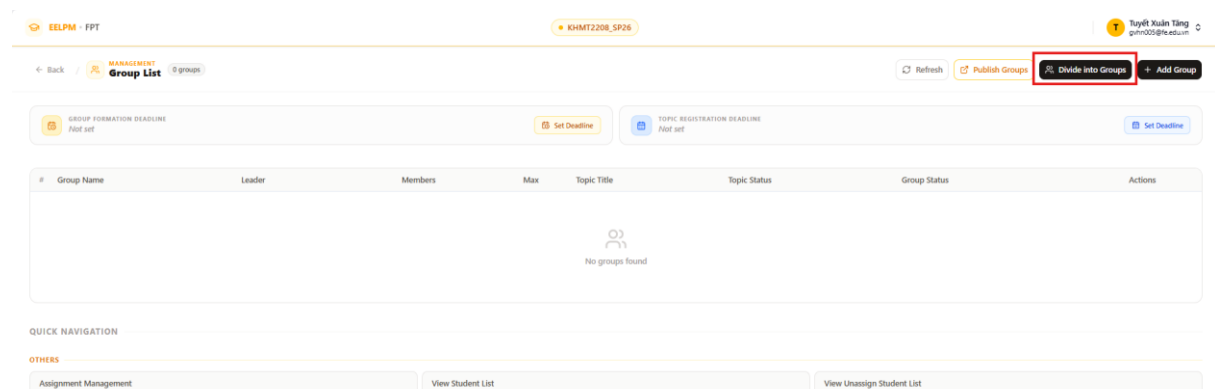

On the Lecturer Portal, click on the Class Name to enter the management environment.

#	Class Name	Class Code	Student Count	Semester	Status

Step 2: Configure the timeframe and save.

3.3.9 Approve the group

Step 1: Click on a Group Name with status "Pending".

The screenshot shows the 'Group List' page in the 'EELPM - FPT' system. At the top, there are navigation links and buttons like 'Refresh', 'Publish Groups', 'Divide into Groups', and 'Add Group'. Below these are two sections for setting deadlines: 'GROUP FORMATION DEADLINE' and 'TOPIC REGISTRATION DEADLINE', both with 'Set Deadline' buttons. The main part of the page is a table with the following data:

#	Group Name	Leader	Members	Max	Topic Title	Topic Status	Group Status	Actions
1	CNTT2201_05	Lam Tuyền Hoàng	2	6	---	---	Pending	[Icon] [Icon]
2	CNTT2201_04	Hoa Thanh Đào	2	6	---	---	Draft	[Icon] [Icon]

Smart Campus Delivery System v2

DESCRIPTION

A startup project that provides an on-demand delivery service within university campuses. The system connects students who need items (food, documents, daily essentials) with nearby student couriers. It aims to reduce delivery time, optimize campus logistics, and create part-time job opportunities for students.

OBJECTIVES

Build a fast and reliable intra-campus delivery platform
Reduce waiting time for students ordering food or items
Provide part-time income opportunities for student couriers
Optimize delivery routes using smart algorithms
Ensure secure and cashless transactions within the system

3.3.12 View Topic Change History

Step 1: After logging in, select a class, then choose the group whose topic change history you want to view.

3.6 User Manual Admin Side

3.6.1. Manage Staff

3.6.1.1. View Staff

Step 1: After logging in, click the “**Manage Staff**” button.

Admin Home Page

SYSTEM

Manage Staff

Setting System Email

3.6.1.2. Create Staff

Step 1: After logging in, click the “**Manage Staff**” button.

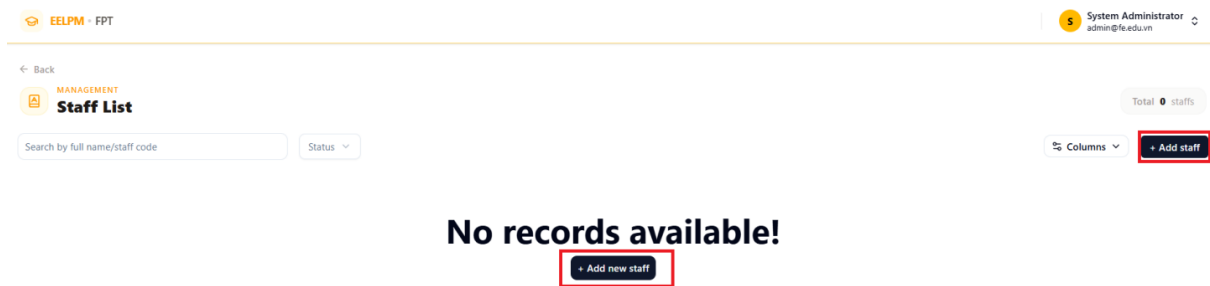

Admin Home Page

SYSTEM

Manage Staff

Setting System Email

Step 2: Click the “**Add Staff**” button.

Step 3: Enter the staff information: Full name, email, gender, and select a campus.

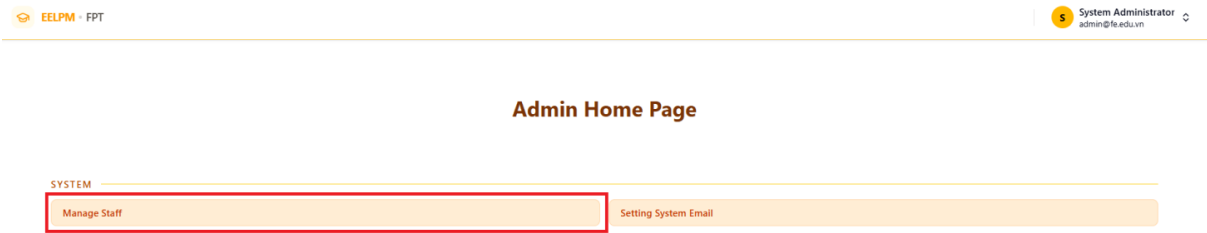

This screenshot shows the 'Create Staff' form. The header is identical to the previous page. The main section is titled 'PERSONAL INFORMATION'. It contains four input fields: 'Full Name' (with placeholder 'e.g. Nguyen Van A'), 'Email' (with placeholder 'e.g. nguyenvana@fpt.edu.vn'), 'Gender' (with radio buttons for 'Male' and 'Female'), and 'Campus' (a dropdown menu with 'Select a campus...' as the selected option). At the bottom left, there is an orange 'Create Staff' button with a plus icon, and a 'Cancel' link is positioned to its right.

Step 4: Click the “Create Staff” button.

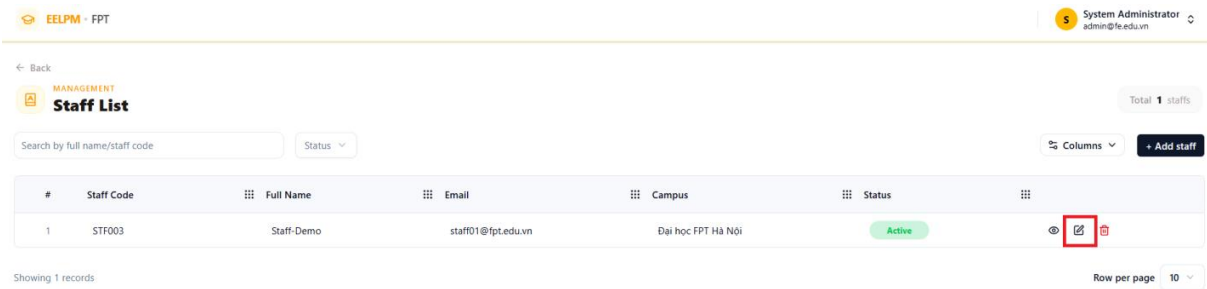

This screenshot is identical to the previous one, showing the 'Create Staff' form. The only difference is that the orange 'Create Staff' button at the bottom left is now highlighted with a red border, indicating it should be clicked to complete the process.

3.6.1.3. Update Staff Information

Step 1: After logging in, click the “Manage Staff” button.

Step 2: Click the **edit icon** to modify the staff information.

Step 3: Enter the updated details: Full Name, Email, Gender, Campus, and Status.
